

Prologue

As the United States enters the ninth year of the global war on terrorism, and with service members continuing to be placed in harm's way in Iraq, Afghanistan, and foreign theaters, the Department of Veterans Affairs (VA) is facing growing pressure to meet their needs and the needs of the veterans of earlier service. The sacrifices these brave soldiers, sailors, airmen, marines, and coastguardsmen have made will leave some of them dealing with a lifetime of physical and psychological wounds. It is for these men and women and the millions who came before them that we set out each year to assess the health of the one federal department whose sole task it is to care for them and their families.

The Independent Budget is based on a systematic methodology that takes into account changes in the size and age of the veteran population, cost-of-living adjustments, federal employee staffing, wages, medical care inflation, construction needs, the aging health-care infrastructure, trends in health-care utilization, benefit needs, efficient and effective means of benefits delivery, and estimates of the number of veterans and their spouses who will be laid to rest in our nation's cemeteries.

The Independent Budget for Fiscal Year 2011 will be released in February 2010 concurrent with the release of the President's proposed budget for the Department of Veterans Affairs. This budget by veterans for veterans is designed to alert the Administration, Congress, VA, and the general public to the most important issues concerning VA health care, benefits, and benefits delivery that deserve special scrutiny and attention by policy makers. *The Independent Budget* presents specific funding, policy, and legislative recommendations for FY 2011 and medical care recommendations for FY 2012. Through these efforts we believe VA will be better positioned to successfully meet the challenges of the future. We intend that this document provides direction and guidance to the Administration and Members of Congress.

As the war on terrorism grows longer and longer, so does the obligation that this country owes to the men and women who have served and sacrificed. Additionally, we must be cognizant of the current fiscal realities in a time of turbulent and rapidly fluctuating economic conditions that may compel veterans of past service to seek VA care and benefits for the first time.

With this new reality ever present in our minds, we must do everything we can to ensure that VA has all the tools it needs to meet the challenges of today and the problems of tomorrow. Our sons, daughters, brothers, sisters, husbands, and wives who serve on the frontier of freedom need to know that they will come home to a nation that respects and honors them for their service, while also providing them with the best medical care to make them whole, the best vocational rehabilitation to help them overcome the employment challenges created by injury, and the best claims-processing system to deliver education, compensation, and survivors' benefits in a minimum amount of time to those most harmed by their service to our nation.

(Continued)

We are proud that this will mark the 24th year of *The Independent Budget*. We are equally proud of the respect and influence that it has gained during that time. The coauthors of this important document—AMVETS, Disabled American Veterans, Paralyzed Veterans of America, and the Veterans of Foreign Wars of the United States— work hard each year to ensure that *The Independent Budget* is the voice of responsible advocacy and that our recommendations are based on facts, rigorous analysis, and sound reasoning.

We hope that each reader approaches this document with an open mind and a growing understanding that America’s sick and disabled veterans should not be treated as the cannon fodder of war, but rather as the living price of freedom.

IB Authors

The four coauthoring organizations of *The Independent Budget (IB)* have worked in collaboration for 24 years on the *IB* to honor veterans and their service to our country. Throughout the year, each organization works independently to identify and address legislative and policy issues that affect the organizations' memberships and the broader veterans community.

AMVETS

Since 1944, AMVETS has been preserving the freedoms secured by America's armed forces, and providing support for veterans and the active military in procuring their earned entitlements, as well as community service and legislative reform that enhances the quality of life for this nation's citizens and veterans alike. AMVETS is one of the largest Congressionally chartered veterans' service organizations in the United States, and includes members from each branch of the military, including the National Guard and Reserves.

DISABLED AMERICAN VETERANS

The Disabled American Veterans (DAV), founded in 1920 and chartered by Congress in 1932, is dedicated to a single purpose—building better lives for our nation's service-disabled veterans and their families and survivors. This mission is carried forward by providing outreach and free, professional assistance to veterans and their dependents and survivors in obtaining benefits and services earned through military service. DAV members also provide voluntary services in communities across the country and grassroots advocacy from educating lawmakers and the public about important issues to supporting services and legislation to help disabled veterans and their families.

PARALYZED VETERANS OF AMERICA

Paralyzed Veterans of America (Paralyzed Veterans), founded in 1946, is the only Congressionally chartered veterans service organization dedicated solely to serving the needs of veterans with spinal cord injury or dysfunction (SCI/D). Paralyzed Veterans' mission is to maximize the quality of life for its members and all people with disabilities. Paralyzed Veterans is a leading advocate for health care, SCI/D research and education, veterans' benefits, sports and recreational rehabilitation opportunities, accessibility and the removal of architectural barriers, and disability rights. Paralyzed Veterans of America is composed of 34 chapters that work to create an America where all veterans, people with disabilities, and their families can achieve their independence and thrive. Paralyzed Veterans represents more than 19,000 veterans in all 50 states, the District of Columbia, and Puerto Rico.

VETERANS OF FOREIGN WARS OF THE U.S.

The Veterans of Foreign Wars of the U.S. (VFW), founded in 1899 and chartered by Congress in 1936, is the nation's largest organization of combat veterans and its oldest major veterans'

(Continued)

service organization. Its 1.5 million members include veterans of past wars and conflicts, as well as those who currently serve in the active, Guard and Reserve forces. Located in 7,900 VFW Posts worldwide, the VFW and the 600,000 members of its Auxiliaries are dedicated to “honoring the dead by helping the living.” They accomplish this mission by advocating for veterans, service members and their families on Capitol Hill as well as state governments; through local community and national military service programs; and by operating a nationwide network of service officers who help veterans recoup more than \$1 billion annually in earned compensation and pension.

Individually, each of the coauthoring organizations serves the veteran community in a distinct way. However, the four organizations work in partnership to present this annual budget request to Congress with policy recommendations regarding veterans’ benefits and health care, as well as funding forecasts for the Department of Veterans Affairs.

Guiding Principles

- ❖ Veterans must not have to wait for benefits to which they are entitled.
- ❖ Veterans must be ensured access to high-quality medical care.
- ❖ Veterans must be guaranteed timely access to the full continuum of health-care services, including long-term care.
- ❖ Veterans must be assured burial in state or national cemeteries in every state.
- ❖ Specialized care must remain the focus of the Department of Veterans Affairs (VA).
- ❖ VA's mission to support the military medical system in time of war or national emergency is essential to the nation's security.
- ❖ VA's mission to conduct medical and prosthetic research in areas of veterans' special needs is critical to the integrity of the veterans' health-care system and to the advancement of American medicine.
- ❖ VA's mission to support health professional education is vital to the health of all Americans.
